the tests must be carried out in an area relatively free of vapors and excessive dust. See Table 1 and Table 2 for test selections. Table 1: Abrasive Wear and Abrasive Load Tests. Table 2: Abrasive wear and abrasive load tests. The abrasive wear test is performed to evaluate the life of the product, including verifying that the material can be used for other purposes. This test includes abrasion tests on a surface where more abrasion occurs than on the surface of the base coating.
