

A: The leading space is there because the letter 'a' in arabic is written as two letters: 'aa'. That's what I would probably do in your situation, but at least you should understand why 'a' is missing. [Effects of abnormal left ventricular wall motion on the prognosis and mechanism of myocardial fibrosis in patients with hypertrophic cardiomyopathy]. To investigate the effects of abnormal left ventricular (LV) wall motion on the prognosis and mechanism of myocardial fibrosis in patients with hypertrophic cardiomyopathy (HCM). The clinical data of 106 HCM patients (aged 41.5 +/- 11.3 years) undergoing cardiac surgery, or receiving catheter examination in the past five years were analyzed. Among the cases of abnormal LV wall motion, 71 (66%) were with abnormal segment motion only, 36 (34%) were with abnormal segment motion and wall thickening, and 41 (39%) were with abnormal wall thickening only. These patients were followed up for 2.0 +/- 0.6 years (ranged from 6 months to 5.6 years), the outcome was analyzed with the abnormal segment motion only and abnormal wall thickening only respectively. There were no significant difference between these two groups in the survival time, the incidence of clinical endpoints, and the incidence of sudden death. The survival rate in the abnormal segment motion only group was significantly lower than that in the normal segment motion group. The number of positive myocardial biopsies in the abnormal segment motion only group was significantly higher than that in the normal segment motion group (P Serology for diagnosis of Yersinia pseudotuberculosis infection in dairy cows. The value of an ELISA for the serological diagnosis of Yersinia pseudotuberculosis
